## The TrekPod By Trek-Tech

The TrekPod should be a pleasant surprise for both outdoor enthusiasts and photographers alike. This walking/hiking staff is really an innovative tripod system constructed from special aluminum alloy and polymer materials that reduces the weight to just 30 ounces. The TrekPod is height adjustable and offers a magnetic quick-release mount-dismount system that Trek-Tech dubbed the MagMount. MagMount uses a strong rare earth magnet coupler and standard 1/4-20 threaded stud which can be used with any digital or 35mm camera, spotting scope or binocular. Please visit [www.trek-tech.com](http://www.trek-tech.com) for more information. Trek Technologies LLC (Trek-Tech), 15858 SW Upper Boones Ferry Rd., Lake Oswego, OR 97035; 503/459-0030.
