

TrekPod™ **GO!** with MagMount™ AR/i by Trek-Tech™

TrekPod *GO!* in Monopod/Hiking Staff Mode

TrekPod *GO!* in Tripod Mode

TrekPod *Go!* is Trek-Tech's premier tripod/monopod/hiking staff multi-tool which incorporates numerous customer-requested enhancements including the ability to pack into its included carry case and fit in an overhead carry-on. It also telescopes 4" shorter in the hiking staff/monopod mode, has "soft touch" rubber locking nuts, captures the palm rest so it won't get lost, and introduces the new MagMount AR/i, while retaining all of the original TrekPod's innovative capabilities.

Magmount™ AR/i is a significant refinement of the industry's first magnetic quick-release camera and optical device mounting system. It provides for the instant attachment of almost any camera, spotting scope or other device that uses the industry standard 1/4"-20 mounting stud. The new **Anti-Rotation** feature locks your portrait shots in place, and indexing every 30° aids with panorama photos and precise position repeatability.

SPECIFICATIONS:

Limited Lifetime Warranty. For complete warranty details visit trekpod.com, call us at 503.459.0030, or ask your retailer for details.
