

WindowMount Plus™ with MagConnect™ by Trek-Tech™

Additional Light Force (silver) and Heavy Force (black) MagAdaptors are available so that all of your camera and optical devices are ready for instant attachment to your MagMount or MagConnect system

WINDOWMOUNT PLUS™ is the newest member of the Trek-Tech camera and optics stabilization family that utilizes our innovative MagMount™ and MagConnect™ magnetic quick mount systems. Our magnetic mount system provides for the instant attachment of almost any camera or spotting scope by using one of the included MagAdaptors™.

Using our system you can interchange cameras, spotting scopes, binoculars and range finders in seconds, and be ready to travel again in a few seconds more.

MagMount and MagConnect systems provide unprecedented levels of flexibility and functionality for photographers, hunters and birders. Once you've used a MagMount in conjunction with any of your optics stabilization tools, you'll wonder why no one thought of this concept before!

WindowMount Plus includes one light force (silver) and one heavy force (black) MagAdapter, Safety Clip & carry case.
